Appendix Definitions

## CERTAIN DEFINITIONS AND NON-GAAP MEASURES

Readers are cautioned that certain terms used in the investor presentation listed below, including any related per Unit amounts, used by Management of Allied to measure, compare and explain the operating results and financial performance of Allied do not have any standardized meaning prescribed under IFRS and, therefore, should not be construed as alternatives to net income, cash flow from operating activities, or any other measure prescribed under IFRS. These terms are defined below. The following terms do not have a standardized meaning prescribed by IFRS and may not be comparable to similarly titled measures presented by other publicly traded entities. Refer to the Non-GAAP Measures section on page 17 of the MD&A as at September 30, 2023, available on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca), to find reconciliations of the Non-GAAP Measures to their most comparable IFRS measures. Such reconciliations are incorporated by reference herein.

### PROPORTIONATE BASIS

Proportionate basis is a non-GAAP financial measure representing Allied's proportionate share of equity accounted investments. Allied applies the equity method of accounting to its joint venture, TELUS Sky, as prescribed under IFRS. Management presents the proportionate share of its interests in joint arrangements that are accounted for using the equity method as it is viewed as relevant in demonstrating Allied's performance and is the basis of many of Allied's key performance measures.

### NET ASSET VALUE PER UNIT ("NAV PER UNIT")

Prior to Allied's conversion to an open-end trust, NAV per unit was calculated as total equity as at the corresponding period ended, divided by the actual number of Units and class B limited partnership units of Allied Properties Exchangeable Limited Partnership ("Exchangeable LP Units") outstanding at period end. With Allied's conversion to an open-end trust on June 12, 2023, NAV per unit is calculated as total equity plus the value of Exchangeable LP Units as at the corresponding period ended, divided by the actual number of Units and Exchangeable LP Units. The rationale for including the value of Exchangeable LP Units is because they are economically equivalent to Units, receive distributions equal to the distributions paid on the Units and are exchangeable, at the holder's option, for Units.

### **NET OPERATING INCOME (“NOI”)**

NOI is a non-GAAP financial measure defined as rental revenue less property operating costs on a proportionate basis, excluding the impact of non-cash items such as amortization of improvement allowances and the amortization of straight-line rents on a proportionate basis. The most directly comparable IFRS measure to NOI is Operating Income. Management believes this is a useful measure as it demonstrates the cash generating operating performance of its income producing properties.

### **UNENCUMBERED INVESTMENT PROPERTIES AND INVESTMENT PROPERTIES HELD FOR SALE**

Unencumbered investment properties and investment properties held for sale is a non-GAAP measure defined as the value of investment properties and investment properties held for sale which are free and clear of any encumbrances. This is calculated on a proportionate share basis. Management believes unencumbered investment properties and investment properties held for sale is a useful measure to assess the borrowing capacity of Allied.

### **ADJUSTED EARNINGS BEFORE INTEREST, TAXES, DEPRECIATION AND AMORTIZATION (“ADJUSTED EBITDA”)**

Adjusted EBITDA is a non-GAAP measure calculated on a proportionate basis comprised of earnings before interest expense, income taxes, depreciation and amortization expense (including amortization of improvement allowances), impairment, gains and losses on disposal of investment properties and the fair value gains or losses associated with investment properties and investment properties held for sale, Exchangeable LP Units, financial instruments, and unit-based compensation.

### **NORMALIZED LAST QUARTER ANNUALIZED NOI (“NORMALIZED LQA NOI”)**

Normalized LQA NOI is a non-GAAP measure defined as the normalized NOI of an individual property or portfolio for the most recently completed quarter multiplied by four. In the calculation of this metric, non-recurring items are excluded from LQA NOI. The most directly comparable IFRS measure to normalized LQA NOI is Operating Income. Management considers normalized LQA NOI relevant in analyzing the operations of its rental properties on a property-by-property or portfolio basis.

## NET DEBT

Net debt is a non-GAAP measure, calculated on a proportionate basis, as debt less cash and cash equivalents and less a deposit management considers to be cash equivalent. The most directly comparable IFRS measure to net debt is debt. Management considers net debt a useful measure for evaluating debt levels and interest coverage.

## TOTAL INDEBTEDNESS RATIO

This is a non-GAAP measure of Allied's financial leverage, which is calculated on a proportionate basis by taking debt plus outstanding letters of credit divided by total assets. Management considers this metric useful as it indicates Allied's ability to meet its debt obligations.

## INTEREST COVERAGE RATIO

This is a non-GAAP measure defined as Adjusted EBITDA divided by interest expense with interest capitalized included and distributions on Exchangeable LP Units, which are recognized as interest expense, excluded. Management considers these metrics useful as they indicate Allied's ability to meet its interest cost obligations.

## TOTAL RETURN

Total return is based on \$100 in units invested on February 6th, 2003 and ending on September 30, 2023, assuming the re-investment of all cash distributions of the trust on the day of the distribution.
